SUMMARY

Dynamic Web Development Intern – Surinder Academy Gained hands-on experience in developing dynamic and secure web applications. Skilled in crafting responsive interfaces and enhancing user experience using HTML, CSS, JavaScript, and PHP. Designed and implemented a secure login system with HTTP request handling and applied VAPT practices to identify and fix security vulnerabilities. Collaborated to maintain visual consistency and applied strong problem-solving skills to ensure successful projects and improved site performance

Skills

- **Full Stack Development:** HTML, CSS, JavaScript, PHP, MySQL, Bootstrap
- **Backend:** PHP, MySQL
- **Programming Languages:** C, C++
- **Developer Tools:** VS Code, XAMPP, Git

Experience

Surinder Academy – Web Development Intern | Makhu, India | March 2025 – August 2025

- Assisted in designing clean, user-friendly interfaces and improving visual consistency across web pages.
- Developed and coded responsive web pages using HTML, CSS, and JavaScript, adapting to project requirements.
- Monitored and identified issues with security system performance.
- Implemented basic web security measures, including secure login handling, input validation, and protection against common vulnerabilities.

Education

Bachelor of Technology (B.Tech) in Computer Science & Engineering

Shaheed Bhagat Singh State Technical University, Ferozepur

Graduated: 2025

Projects

E-commerce Website (Full Stack) – Developed a full-featured e-commerce application with custom website design. Implemented secure user authentication using random tokens and email-based verification to strengthen account security. Built complete product management features including create, edit, update, delete, and status control. Designed a responsive, intuitive UI with support for rich-text editing, image uploads, and dynamic filtering, ensuring a seamless content creation and browsing experience.
